Sun Control Systems

A HunterDouglas<sup>®</sup> PRODUCT

## Luxalon® Aeroscreen

The Luxalon® Aeroscreen has perforated wing-shaped fins, allowing an optimal solar control combined with light control. The solid construction with its light appearance results in an attractive product.

- Perforated and pre-formed metal sheets mounted to an aluminium sub-structure
- Coil coated with a UV and scratch resistant Luxacote® coating available in 14 standard colours. Other colours on request.
- Horizontal fin position
- System projected horizontally or positioned vertical
- Two systems available
  - Fins fixed at an angle selected between 0 and 180 degrees
  - Adjustable fins with manual or motorised operation, suitable for Building Management Systems
- Two standard support structures available, in tube or strip
- Corner solutions available
